INSEAD Women

The case for empowering women has never been stronger, not just because it is the right thing to do but because it is the smart thing to do. A growing body of empirical work shows that improving gender balance in the workplace boosts employee retention and organisational performance. It encourages economic growth and benefits society more broadly. Education plays a critical role in developing gender balance in leadership. INSEAD is committed to being a key player in this space.

INSEAD develops the next generation of female and male business leaders who are inspired and equipped to address gender balance throughout their careers in an integrated way through the INSEAD Gender Initiative (IGI). We are evidence-based, rigorous and innovative. The IGI engages faculty, staff and alumni – male and female alike – to positively impact education, businesses and society.

Leading by example: To walk the talk, we are working towards gender balance within our own organisation, leveraging academic insights and investigating best practices across diverse cultures.

Developing Pedagogy: We are developing our faculty to teach in a gender-balanced way across all programmes and educating students on the benefits of and the tools to develop an inclusive environment.

Engaging Alumni: To maximise our reach, we are raising awareness and providing practical knowledge that enables INSEAD alumni to become effective champions for gender diversity and inclusion.

Partnering with business and society: Through knowledge creation and sharing, we are supporting organisations to realise the benefits of improved gender balance with effective programmes and policies.
